Job Description

Software Automation Developer II (Test Automation Engineer II) Through its administration of the $10 billion Universal Service Fund (USF) programs on behalf of the FCC, USAC works to promote the availability of quality services at just, reasonable and affordable rates and to increase access to advanced telecommunications services throughout the nation. Specifically, the USF programs provide funding for the expansion of telecommunications and broadband access to rural communities and health care facilities, schools and libraries across the country, and low income households. Through program administration, auditing, and outreach, USAC works with contributors, service providers, and program beneficiaries to achieve the program goals articulated by the FCC for each of these programs. The FCC has reformed the USF to support further investment in and access to evolving broadband infrastructure, making the programs a primary vehicle to support this critical national priority. USAC, as the administrator of the USF, plays a critical role in supporting the ambitious vision to ensure that all citizens in the United States have access to high-speed broadband. The organization has approximately 500 employees with an operating budget of more than $200 million. USAC works in close partnership with the FCC and other federal and state partners to support the achievement of the USF program goals. USAC administers the USF programs-High Cost, Lifeline, Rural Health Care, and Schools and Libraries. USAC strives to provide efficient, responsible stewardship of the programs, a key national asset in making important telecommunications and Internet services available to consumers, health care providers, schools, and libraries throughout the United States. The program divisions are supported by additional USAC personnel in Finance, General Counsel, Information Systems, Internal the Enterprise Program Management Office and Human Resources. Consistent with FCC rules, USAC does not make policy for or interpret unclear provisions of statutes or the FCC's
